Laminate Care and Maintenance

Ordinarily vacuuming and sweeping is usually sufficient to keep the floor clean. If needed, occasionally clean with a cloth or mop (micro-fiber or terrycloth hooded) slightly moistened with a laminate cleaner.

Important Tips:

- Never flood the floor with water.
- Do not use soap-based detergents, as these may leave a dull finish on your floor.
- Do not use abrasive cleaners, steel wool, or scouring powder, as these may scratch your floor.
- Never wax, polish, sand, or lacquer a laminate floor.
- Use doormats outside each entrance to your home to prevent dirt, sand, grit, and other substances such as oil, asphalt, and driveway sealer from being tracked onto your floor.
- For furnishings, use wide-bearing, non-staining floor protectors, such a clear, hard plastic or non-staining felt protectors.

The overall stain resistance of Laminate floors is excellent and most spills will wipe off quickly and easily with a clean, white cloth. Removing certain substances may take a little extra effort, as outlined in the information below.

Maintenance Chart:

Stain Problem	Procedure
Juice, Wine, Grease, Chocolate	Dampen a rag with laminate cleaner and spot clean
Cigarette Burns, Asphalt, Shoe Polish, Paint, Ink, Crayon, Dried Foods, Nail Polish	Dampen a rag with alcohol or nail polish remover and spot clean
Candle Wax, Chewing Gum	Allow to harden and gently scrape with plastic scraper
